SMOKE TEST CHECKLIST

# Agaram — Does the APK work?

Run these ~35 checks once before handing the APK to your club. ~45 min total.

**How to use this sheet:** Install the APK on a phone, then work down the list. Tick the box if the step does what the "Expected" column says. If it doesn't, circle the ID and write what happened in the margin.

**Who needs to run this:** ideally 3 people — one President, one Admin, one plain Member — so every role's flows get tested at once. If you're alone, create 3 test accounts and switch.

TESTER NAME _____ DATE _____

APK VERSION _____

☐ tick when step passes  Circle the ID & note the issue if it fails

## 1. Install & first launch

| ID | STEP | EXPECTED | PASS |
|---|---|---|---|
| INST–1 | Install the APK on an Android phone (share via USB, WhatsApp, or drive). | Installs without warnings (other than the normal "install from unknown source" prompt). | ☐ |
| INST–2 | Tap the Agaram icon to open. | Splash screen with logo + "Tamil Ilakiya Mandram" appears, then the Sign-In screen. | ☐ |
| INST–3 | When Android asks "Allow notifications?" — tap Allow. | Prompt appears once, then never again. | ☐ |

## 2. Sign in & out

| ID | STEP | EXPECTED | PASS |
|---|---|---|---|
| AUTH–1 | Enter a wrong email format (e.g. `foo`). Tap Sign In. | Red error under the field: "Enter a valid email". | ☐ |
| AUTH–2 | Enter a real email with wrong password. Tap Sign In. | Snackbar: "Email or password is incorrect." | ☐ |
| AUTH–3 | Enter correct email and password. Tap Sign In. | Lands on Home (Member) or Admin Dashboard (Admin). Bottom nav visible. | ☐ |
| AUTH–4 | Tap "Forgot password?" → enter your email → Send reset. | Snackbar: "If that email is registered, a reset link is on the way." (A reset email arrives in 1–2 min.) | ☐ |
| AUTH–5 | Close the app (recent-apps swipe) and re-open. | Skips Sign-In and goes straight to Home — your session is remembered. | ☐ |
| AUTH–6 | Go to Profile tab → tap Sign Out. | Returns to the Sign-In screen. Opening the app again shows Sign-In. | ☐ |

## 3. Member everyday flows

Member

| ID | STEP | EXPECTED | PASS |
|---|---|---|---|
| MEM–1 | Open the Home tab. | Today's Kural (Tamil + English), this month's theme, upcoming events list, notification bell icon. | ☐ |
| MEM–2 | Tap the notification bell (top-right). | Notifications inbox opens. Shows past announcements in order (newest first). | ☐ |
| MEM–3 | Go to Events tab → tap any upcoming event. | Event detail shows banner, date, venue, description, and tabs: Attendance / Tasks / Gallery / Wallet. | ☐ |

| | | | |
|---|---|---|---|
| MEM–4 | On event detail → tap "Check in" during the attendance window. | Camera opens. After scanning the QR the admin shows, you see "Checked in ✓". | ☐ |
| MEM–5 | Try scanning the same QR a second time. | Message: "You're already checked in for this event." | ☐ |
| MEM–6 | Go to Tasks tab. Tap a Pending task assigned to you. | Task detail shows title, description, due date, and an "Upload proof" button. | ☐ |
| MEM–7 | Tap "Upload proof" → pick a photo < 10 MB → add a note → Submit. | Task status changes to "Submitted — waiting for review". | ☐ |
| MEM–8 | Try to upload a photo > 10 MB. | Friendly error: "Please keep it under 10 MB." | ☐ |
| MEM–9 | Open the event's Gallery tab → upload a photo with a caption. | Photo appears at the top of the gallery with your name & time. | ☐ |
| MEM–10 | Long-press your own photo → Delete. | Photo is removed. You can only delete photos you uploaded. | ☐ |
| MEM–11 | Open the event's Wallet tab → upload a PDF receipt. | PDF appears with file name, size, and your name. | ☐ |
| MEM–12 | Go to the Leaderboard (from Home). | Top 3 members on podium, rest listed below. Your row is highlighted with a border. | ☐ |
| MEM–13 | Profile tab → tap avatar → pick a new photo. | Photo uploads to Cloudinary and shows on your profile + leaderboard row. | ☐ |

## 4. Admin flows

Admin

| ID | STEP | EXPECTED | PASS |
|---|---|---|---|
| ADM–1 | Sign in as an Admin. Check the home screen. | Admin Dashboard appears (not member Home) with stats cards + Review Queue preview. | ☐ |
| ADM–2 | Events tab → tap **+** → fill Title / Description / Venue / Date & Time / Duration → Create. | Event appears in Upcoming list. Every other user gets a push notification within a minute. | ☐ |

| | | | |
|---|---|---|---|
| ADM–3 | Open the event you just created → upload a banner image. | Banner shows on the event card. (Oversized images rejected under 5 MB.) | ☐ |
| ADM–4 | On the event → Attendance tab → "Start attendance". | A QR code appears on screen. Attendance tab shows "Rotate QR" option. | ☐ |
| ADM–5 | Ask a Member (on another phone) to scan the QR. | Their name appears in the event's Attendance list within seconds. | ☐ |
| ADM–6 | Tap "Rotate QR". Ask the same member to try the OLD QR. | Member sees: "That QR is invalid or expired." | ☐ |
| ADM–7 | On Attendance → "Mark manually" → pick a member who hasn't scanned. | Member added to attendance list. Their stars increase by 2. | ☐ |
| ADM–8 | On the event → Tasks tab → + Add task → pick assignee → Create. | Assignee gets a push "New task: <title>". Task shows Pending in their Tasks tab. | ☐ |
| ADM–9 | Dashboard → Review Queue → open a submitted task → Approve. | Task status: Approved. Member gets push "Task approved · +3 stars". Their stars go up by 3. | ☐ |
| ADM–10 | Open another submitted task → Reject with a short note. | Task status: Rejected. Member gets push with your note. No stars awarded. | ☐ |
| ADM–11 | Ask the rejected member to re-upload proof. | Status flips from Rejected → Submitted. Appears in your Review Queue again. | ☐ |
| ADM–12 | Members list → + Add member → fill form → Suggest password → Create. | Success screen shows the new email + password. Copy it. New member can sign in. | ☐ |
| ADM–13 | Open an existing member → Deactivate. | Member status flips to Inactive. They can't sign in (tries to → "account disabled"). | ☐ |
| ADM–14 | Reactivate the same member. | Their sign-in works again. No data was lost. | ☐ |
| ADM–15 | Notifications → + Compose → choose "All members" → write + Send. | Every signed-in member receives a push notification + inbox entry. | ☐ |

**Tip for ADM-5 / ADM-9:** Pushes arrive within 5–30 seconds normally. If none arrive, make sure the

phone had **Allow notifications** granted (INST-3) and the user signed in at least once.

## 5. President-only checks

President

| ID | STEP | EXPECTED | PASS |
|---|---|---|---|
| PRES–1 | As the President, sign in. Open any member profile. | You see a "Remove from club" button that non-President admins don't have. | ☐ |
| PRES–2 | Try this on a different admin account: open President's own profile and try to demote. | Normal admins can't see or use the President-change option. Only the President can. | ☐ |
| PRES–3 | Change another member's Position to "President". | The badge transfers. Your own isPresident flag clears. New President has the button above now, you don't. | ☐ |

## 6. Cross-cutting checks (everyone)

| ID | STEP | EXPECTED | PASS |
|---|---|---|---|
| X–1 | Turn on Airplane mode. Try to sign in. | Message: "Network error. Check your internet connection." | ☐ |
| X–2 | Already signed in → Airplane mode on → open Events tab. | Events still show (cached from last sync). A small "offline" hint is OK. | ☐ |
| X–3 | Turn Airplane mode off → pull-to-refresh any list. | List updates with fresh data from the server. | ☐ |
| X–4 | Close the app completely. Admin creates a new event. Tap the push notification. | App opens directly to the new event's detail screen. | ☐ |
| X–5 | With app in the background, admin sends a "Task assigned" push. Tap it. | App opens to the assigned task's detail screen. | ☐ |
| X–6 | Rotate the phone to landscape (if supported). | No crash. Layout may shift but all controls stay reachable. | ☐ |
| X–7 | Two members sign in on two phones with the same account. | Both sessions stay valid. Actions on one appear on the other within a second or two. | ☐ |

| | | | |
|---|---|---|---|
| X–8 | As admin, deactivate a member who is currently signed in. | Their app signs them out within a few seconds automatically. | ☐ |

## Final tally

Total checks: **41**

PASSED _____

FAILED _____

BLOCKED / SKIPPED _____

**Verdict:** If all INST, AUTH, MEM-1 through MEM-9, and ADM-1 through ADM-12 pass, the APK is safe to hand out to members. Failures in X-* are usually environment issues — re-test on a different phone before filing them as bugs.
