SMOKE TEST CHECKLIST · V1.1

Agaram — Does the APK work?

Full-app regression pass: ~55 checks, ~60 minutes across three testers (one Admin, one Member, one President).

How to use: Install the APK on a phone, then work down the list. Tick the box if the step does what the "Expected" column says. If it doesn't, circle the ID and write what happened in the margin.

Best run: 3 testers in parallel — one President, one Admin, one plain Member — so every role's flows get tested at once. Solo runs work too — create 3 test accounts and switch.

Prerequisites: valid `assets/fcm-service-account.json` in the APK (not the placeholder) for pushes; admin account authorized with Google Drive if you're running the archive checks (ARCH-*).

TESTER NAME _____ DATE _____

APK VERSION _____

☐ tick when step passes Circle the ID & note the issue if it fails

NEW marks cases added for this release

1. Install & first launch

ID	STEP	EXPECTED	PASS
INST-1	Install the APK on an Android phone (USB, WhatsApp, or Drive).	Installs without warnings (other than the normal "install from unknown source" prompt).	☐
INST-2	Tap the Agaram icon to open.	Splash with logo + "Tamil Ilakiya Mandram", then the Sign-In screen.	☐
INST-3	When Android asks "Allow notifications?" — tap Allow.	Prompt appears once, then never again.	☐

2. Sign in & out

ID	STEP	EXPECTED	PASS
AUTH–1	Enter a wrong email format (e.g. `foo`). Tap Sign In.	Red error under the field: "Enter a valid email".	☐
AUTH–2	Enter a real email with wrong password. Tap Sign In.	Snackbar: "Email or password is incorrect."	☐
AUTH–3	Enter correct credentials. Tap Sign In.	Lands on Home (Member) or Admin Dashboard (Admin). Bottom nav visible.	☐
AUTH–4	Tap "Forgot password?" → enter your email → Send reset.	Snackbar: "If that email is registered, a reset link is on the way." Email arrives in 1–2 min.	☐
AUTH–5	Close the app (recent-apps swipe) and re-open.	Skips Sign-In and goes straight to Home — session is remembered.	☐
AUTH–6	Profile tab → Sign Out.	Returns to Sign-In. Opening the app again shows Sign-In.	☐

3. Home, profile & leaderboard

Member

ID	STEP	EXPECTED	PASS
MEM–1	Open the Home tab.	Today's Kural (Tamil + English), this month's theme, upcoming events list, notification bell icon.	☐
MEM–2	Tap the notification bell (top-right).	Notifications inbox opens. Past announcements shown newest-first.	☐
MEM–3	Home → Leaderboard.	Top 3 on the podium, rest listed below. Your row is highlighted with a border.	☐
MEM–4	Profile tab → tap avatar → pick a new photo.	Photo uploads to Cloudinary and updates on Profile + leaderboard row.	☐

4. Events & attendance

Member

ID	STEP	EXPECTED	PASS
EVT–1	Events tab → tap any upcoming event.	Event detail shows banner, date, venue, description, tabs: Attendance / Tasks / Gallery / Wallet.	☐
EVT–2	Event detail → "Check in" during the attendance window.	Camera opens. After scanning the admin's QR you see "Checked in ✓".	☐
EVT–3	Try scanning the same QR a second time.	Message: "You're already checked in for this event."	☐
EVT–4	Try scanning a QR after the admin rotated it.	Error: "That QR is invalid or expired."	☐
EVT–5	Events tab → pull-to-refresh.	List refreshes with any newly-created events.	☐

5. Tasks — assignee & viewer

updated Member

ID	STEP	EXPECTED	PASS
TSK–1	Tasks tab (My Tasks). Tap a Pending task assigned to you.	Task detail shows title, description, due date, and a Submit Proof section with image/PDF toggle.	☐
TSK–2	Tap upload area → pick a photo < 10 MB → add a note → Submit for review.	Status flips to "Submitted · awaiting review". Green snackbar "Submitted for review ✓".	☐
TSK–3	Try to upload a photo or PDF > 10 MB.	Friendly error: "Please keep it under 10 MB."	☐
TSK–4	After admin rejects, reopen the rejected task. Re-upload a proof.	Previous reviewer note visible as context. Status flips back to Submitted after you resubmit.	☐
TSK–5	From an event's Tasks tab, tap a task assigned to *another* member (pending or rejected).	Task detail opens read-only — no upload section and no Submit button. You can see title, description, due date.	☐

TSK–6	Tap a peer's *submitted* or *approved* task and inspect the proof area.	Header reads `<Name>'s submission`. Note line (if present) prefixed `Note from member:` — not "Your". NEW	☐

6. Task deadline extension

new Member

ID	STEP	EXPECTED	PASS
EXT–1	On a pending task near its due date, request an extension (e.g. +2 days).	A star-cost ladder is shown (more days = more stars). Confirming deducts the displayed cost from your stars and records `extensionRequestedDays` on the task.	☐
EXT–2	Attempt the same flow with fewer stars than the cost.	Request is blocked with a clear "not enough stars" message. No star deduction.	☐
EXT–3	After requesting, close and reopen the task detail.	Request is visible in the task (pending review or admin action), and the star balance shown on your profile matches the post-deduction total.	☐

7. Gallery & wallet

Member

ID	STEP	EXPECTED	PASS
GAL–1	Event → Gallery → upload a photo with a caption.	Photo appears at the top of the gallery with your name and time.	☐
GAL–2	Long-press your own photo → Delete. Try the same on someone else's photo.	Your photo deletes. Others' photos don't offer a delete action.	☐
WAL–1	Event → Wallet → upload a PDF receipt.	PDF appears with file name, size, and your name.	☐
WAL–2	Upload a non-PDF or > 10 MB file.	Rejected with a clear message about allowed type / size.	☐

8. Admin — events & attendance

Admin

ID	STEP	EXPECTED	PASS
ADM–1	Sign in as Admin. Check the home screen.	Admin Dashboard (not member Home) with stats cards + Review Queue preview.	☐
ADM–2	Events tab → **+** → fill Title / Description / Venue / Date & Time / Duration → Create.	Event appears in Upcoming. Every other user gets a push within a minute.	☐
ADM–3	Open the new event → upload a banner image (< 5 MB).	Banner shows on the event card.	☐
ADM–4	Attendance tab → Start attendance. Ask a member to scan it. Then Rotate QR.	Member's name appears in the attendance list. After rotation, the old QR is rejected on re-scan.	☐
ADM–5	Attendance → Mark manually → pick a member who hasn't scanned.	Member added to list. Their stars increase by 2.	☐
ADM–6	Delete an event (long-press or overflow menu → Delete).	Event disappears for all users. Subcollections (tasks, attendance, gallery, wallet) are cleaned up; collection-group queries don't surface orphans.	☐

9. Admin — tasks & review

updated Admin

ID	STEP	EXPECTED	PASS
ATK–1	Event → Tasks → + Add task → pick assignee → set due date → Create.	Assignee gets a push "New task: <title>". Task shows Pending in their My Tasks.	☐
ATK–2	Ask the member to upload a proof (see TSK-2). Watch the admin device.	Admin receives a push titled `Proof submitted: <task>` with body `<Member> uploaded proof. Tap to review.` NEW	☐
ATK–3	Tap the push notification on the admin device.	App opens directly to the task and — because status is Submitted — lands on the Review screen (approve / reject). NEW	☐

ATK–4	Admin Dashboard → Review Queue → open a submitted task → Approve.	Status: Approved. Member gets push "Task approved · +3 stars". Their stars increase by 3.	☐
ATK–5	Open another submitted task → Reject with a short note.	Status: Rejected. Member gets a push with your note. No stars awarded.	☐
ATK–6	Open a task card for a task assigned to someone else and tap it (pending or rejected, not submitted).	Opens Task Detail in read-only mode. No upload section / Submit button for the admin either. NEW	☐

10. Admin — extension review

new Admin

ID	STEP	EXPECTED	PASS
AEX–1	Have a member request a task deadline extension (see EXT-1). Open that task as admin.	Task shows the requested extra days and the star cost already paid. Admin sees the request alongside the normal review controls.	☐
AEX–2	Accept the extension (extend the due date) and re-open it on the member's device.	New due date is reflected on the task card and detail. Stars already deducted; no double charge.	☐

11. Admin — members & roles

Admin

ID	STEP	EXPECTED	PASS
AMB–1	Members list → + Add member → fill form → Suggest password → Create.	Success screen shows the new email + password. Copy it. The new member can sign in.	☐
AMB–2	Open an existing member → Deactivate.	Member flips to Inactive and can't sign in ("account disabled"). If they were already signed in, their session signs out within seconds.	☐
AMB–3	Reactivate the same member.	Sign-in works again. No data lost.	☐

AMB–4	Change a member's role from `member` → `admin`. Sign in on their device.	They now see the Admin Dashboard. FCM subscription for `admins_only` is added — the next proof submission on any task pushes to them.	☐

12. Wallet archive to Google Drive

new Admin

Prerequisite: the admin has authenticated Google Drive at least once and granted the requested scope.

ID	STEP	EXPECTED	PASS
ARCH–1	As admin, open an event's Wallet tab that has several receipts → tap "Archive to Google Drive".	Sheet shows progress. On success, a folder is created in the admin's Drive and all wallet docs are uploaded into it.	☐
ARCH–2	Repeat the archive on the same event.	Either a new folder is created (timestamped) or the existing one is updated — no duplicate files silently. Admin sees a clear success confirmation.	☐

13. Notifications inbox, audience & badge

updated Everyone

ID	STEP	EXPECTED	PASS
NTF–1	As admin: Notifications → + Compose → audience "All members" → send.	Every signed-in member (and the admin) sees the item in their inbox and receives a push.	☐
NTF–2	Create a new task assigned to Member A. Then open inbox on Member A, Member B, and admin.	Only Member A sees "New task: …" in their inbox. Member B and admin do *not* see it. NEW	☐
NTF–3	Member uploads a proof (re-check after ATK-2). Open the admin's inbox.	New entry "Proof submitted: <task>" is present. Non-admin members do *not* see it. NEW	☐

NTF–4	Look at the bell badge on each device.	Badge count equals the number of items actually visible in the inbox for that user — never includes items hidden by the audience filter. NEW	☐
NTF–5	Open inbox → Mark all read.	Badge drops to 0 for that user. Other users' badges unchanged.	☐
NTF–6	Filter inbox by Events / Tasks / Announcements chips.	Each chip narrows the list correctly within the audience-filtered set.	☐

14. President-only checks

President

ID	STEP	EXPECTED	PASS
PRES–1	Sign in as President. Open any member profile.	A "Remove from club" button is shown — non-President admins don't have it.	☐
PRES–2	On another admin account, try to find the President-change option.	Normal admins can't see or use the President-change option. Only the President can.	☐
PRES–3	Change another member's Position to "President".	Badge transfers. Your own `isPresident` clears. The new President sees the President-only button; you don't any more.	☐

15. Cross-cutting checks

ID	STEP	EXPECTED	PASS
X–1	Turn on Airplane mode. Try to sign in.	Message: "Network error. Check your internet connection."	☐
X–2	Already signed in → Airplane mode on → open Events tab.	Events still show (cached). A small "offline" hint is OK.	☐
X–3	Airplane mode off → pull-to-refresh any list.	List updates with fresh data from the server.	☐
X–4	Close the app completely. Admin creates a new event. Tap the push.	App opens directly to the new event's detail screen.	☐

X–5	With app in the background, admin assigns you a task. Tap the push.	App opens to the assigned task's detail.	☐
X–6	Two devices signed in with the same account.	Both sessions stay valid. Actions on one appear on the other within seconds.	☐
X–7	As admin, deactivate a member who is currently signed in.	Their app signs them out within a few seconds.	☐

Final tally

Total checks: **56**

PASSED _____

FAILED _____

BLOCKED / SKIPPED _____

Verdict: If all INST, AUTH, MEM-*, EVT-*, TSK-1 through TSK-6, ATK-*, AMB-*, and NTF-* pass, the APK is safe to hand out to the club. Failures in X-* are often environment issues — re-test on a different phone before filing them as bugs. ARCH-* and EXT-* require their pre-requisites; mark as "skipped" if you can't meet them for this run.
